

NIKSHAD ALI

Senior Frontend Engineer · React / Next.js / MERN Stack

Peshawar, Pakistan · Open to Remote (Worldwide) · [linkedin.com/in/nikshadali](https://www.linkedin.com/in/nikshadali)

PROFESSIONAL SUMMARY

Meta-certified Senior Frontend Engineer with 4+ years of experience shipping production-grade web applications for international clients in Australia and the UAE. Built SubTV Manager — an enterprise SaaS admin dashboard for an Australian digital signage platform managing Adidas venue campaigns across physical venues. Built Paygex — a live UAE fintech payment platform (PCI DSS Level 1) supporting Apple Pay, Google Pay, and MENA-native payment methods. Built FutureAxis — a Next.js AI ERP consulting platform with auth-protected client dashboard. Specializes in React, Next.js, TypeScript, Shadcn/UI, performance optimization, and technical SEO. Seeking a senior remote frontend role where real product quality matters.

TECHNICAL SKILLS

Frontend: React.js, Next.js (App Router & Pages), TypeScript, JavaScript (ES2022+), HTML5, CSS3

Styling: Tailwind CSS, Styled Components, SCSS/SASS, Bootstrap, Material UI, Shadcn/UI

State & Data: Redux Toolkit, Zustand, React Query, Context API, SWR

Backend: Node.js, Express.js, REST APIs, JWT Auth, Mongoose

Database: MongoDB, Firebase, Supabase

Performance: Core Web Vitals, Lighthouse optimization, SSR, SSG, ISR, lazy loading, code splitting

SEO: Technical SEO, meta strategies, structured data, Next.js SEO patterns

DevOps & Tools: Git, GitHub, Vercel, Netlify, Docker (basics), VS Code, Figma

CMS: WordPress (theme & plugin customization), Headless CMS

PROFESSIONAL EXPERIENCE

Frontend Developer · [Spinsrart](#)

Jan 2023 – Present | Remote · Australia

- Architected and built SubTV Manager — a large-scale enterprise SaaS admin dashboard for a digital signage platform managing 500+ overlays, campaigns, screens, and venue configurations for brands including Adidas across physical venue networks in Australia.
- Engineered a multi-role, multi-module admin system (Venue Management, System Admin, Ops Dash) with advanced data tables handling 510+ records, sortable columns, toggle switches, inline CRUD actions, advanced filters, and paginated results — built with React and Shadcn/UI.
- Built Paygex ([paygex.ae](#)) — a live UAE fintech SaaS landing platform for a PCI DSS Level 1 certified payment gateway supporting Visa, Mastercard, Apple Pay, Google Pay, QR code payments, payment links, and auto-invoicing for MENA businesses.
- Built FutureAxis ([futureaxis.ae](#)) — a Next.js multi-page platform with dark/light theme toggle, auth-protected client dashboard, and SEO-optimized marketing site for a UAE-based AI ERP & business consulting firm.
- Established reusable component libraries, Git branching strategies, and frontend architecture standards adopted across all company products; collaborated asynchronously across Pakistan–Australia time zones delivering consistently on sprint deadlines.

- Integrated third-party APIs including payment gateways, CRM systems, analytics tools, and WhatsApp automation; maintained clean, documented, production-grade codebases across multiple simultaneous client projects.

Junior Frontend Developer · [Andz Consultant](#)

Aug 2020 – Dec 2022 | On-site · Peshawar

- Delivered responsive landing pages, marketing websites, and admin panels for 10+ SME clients using React, achieving consistent 90+ Lighthouse performance scores across all projects.
- Translated Figma designs into pixel-perfect, accessible, cross-browser-compatible interfaces; collaborated directly with designers and project managers to ship on schedule.
- Built dynamic admin panels with JWT authentication, CRUD operations, data tables, and role-based access using React frontends connected to Node.js/Express backends.
- Maintained and extended WordPress-based client sites with custom themes and plugin development for retail and services sector businesses.
- Led a legacy codebase migration from jQuery to modern React, reducing bundle size by 30% and significantly improving maintainability and performance.

Frontend Trainee · [Andz Consultant](#)

Feb 2020 – Jul 2020 | On-site · Peshawar

- Completed structured 6-month frontend engineering training covering HTML5, CSS3, JavaScript ES6+, responsive design, and foundational React architecture patterns.
- Delivered 3 end-to-end training projects independently: a personal portfolio site, an e-commerce product listing UI, and a real-time todo app with local state management.
- Adopted professional engineering practices — Git version control, code review culture, component-driven architecture — under mentorship of senior developers.

FEATURED PROJECTS

SubTV Manager — Enterprise SaaS Dashboard · [React](#) · [Shadcn/UI](#) · [Firebase](#) · [Role-Based Auth](#)

2023 – Present | [subtv-154100.web.app](#)

- Multi-module enterprise admin panel for a digital signage SaaS company — managing overlays, campaigns, venues, screens, user groups, plugins, and planned tasks across physical venue networks for brands like Adidas.
- Built complex data management UI with 510+ record pagination (51 pages), advanced filters, sortable columns, toggle switches, inline edit/duplicate/delete actions, global search with keyboard shortcut, and venue switcher — all in Shadcn/UI with dark mode.
- Implemented multi-tier role architecture (Venue Management · System Admin · Ops Dash) with protected routing and scoped permissions per role.

Paygex — Fintech Payment Platform · [Next.js](#) · [Tailwind CSS](#) · [SEO](#) · [next/image](#) 2024 – Present |

[paygex.ae](#)

- Built the full public-facing platform for a UAE PCI DSS Level 1 certified payment gateway — covering payment links, QR code payments, auto-invoicing, local MENA payment methods, and developer API documentation pages.
- Implemented complete technical SEO — meta descriptions, Open Graph tags, Twitter cards, structured multi-page architecture, and next/image optimization — making the site fully indexable and social-share ready.
- Supports Visa, Mastercard, Apple Pay, Google Pay with 150+ currencies, T+1 settlement, and 24/7 processing messaging; separate business dashboard at [business.paygex.ae](#).

FutureAxis — AI ERP & Business Platform · [Next.js](#) · [Tailwind CSS](#) · [Dark/Light Theme](#) · [Auth](#) 2025 –

Present | [futureaxis.ae](#)

- Designed and built a multi-page Next.js marketing and product platform for a UAE-based AI ERP consultancy — including Services, About, Contact, Referral, and an auth-protected client Dashboard.
- Implemented dark/light theme toggle, next/image optimized assets, responsive navigation, and a structured services showcase covering ERP, accounting automation, digital transformation, and AI integration.

EDUCATION

MBA — Human Resource Management & Finance · [Virtual University of Pakistan](#) 2011

Islamabad, Pakistan

- Specialized in organizational behavior, financial management, and strategic HR — directly applicable to managing client relationships and business operations.
